

# EPIC KWIK Slide® ...

A New Day has dawned for Fleet Media...  
Slide your graphics off and on with the KWIK Slide.

Order this feature when you order your new trailers.

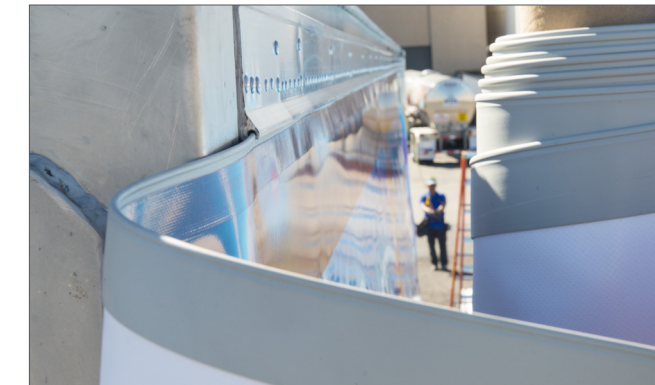

Imagine sliding the vinyl graphic right into the top rail of the trailer side and then sliding the frame into the bottom rail of the trailer side. Next install the 8' front and rear verticals and zip the graphics into place. With all trailers having this feature now graphics and frames can be moved from trailer to trailer or region to region. The entire fleet can be interchangeable.

For leasing companies or large fleets this feature is a must order when you purchase new trailers.
